

EDUCATIONAL PLANNING WORKSHEET (C2, C3, C11)

At least one need/practice gap must be identified, and others may be added as needs arise.

STEP 1 Identified Need	STEP 2 Identified Gap(s)	STEP 3 Learning Objective	STEP 4 Outcomes Measurement
What is the clinical problem that you want to address in the CME activity? What medical issues need more attention?	Why does the clinical problem exist? How can we close the practice gap?	What do you expect the provider to learn during the activity? What do physicians need to be able to do that they are not doing now?	How can the provider apply what is learned to their practice setting? How will you implement your changes or measure if your change is making an impact?
Need:	Gap/Problem:	Objective:	Outcomes:
	<input type="checkbox"/> Knowledge (<i>knows</i>) <input type="checkbox"/> Competency (<i>knows how</i>) <input type="checkbox"/> Performance (<i>does</i>)
