

Area L AHEC Conflict of Interest/Content Validity/Copyright Compliance Form

It is the policy of Area L AHEC to insure balance, independence, objectivity, and scientific rigor in all individually sponsored and jointly sponsored educational activities. All faculty participating in Area L AHEC sponsored activities are expected to disclose to the audience any real or apparent conflict(s) of interest that may have a direct bearing on the subject matter of the continuing education activity. This pertains to relationships with pharmaceutical companies, biomedical device manufacturers, or other corporations whose products or services are related to the subject matter of the presentation topic. In addition, speakers should identify any potential conflict of interest or commercial relationships of their spouse/partner. Speakers will also state when off-label or experimental use of drugs or devices is incorporated in their presentations. The intent of this policy is not to prevent a speaker with a potential conflict of interest from making a presentation. It is merely intended that any potential conflict should be identified so that listeners may form their own judgments about the presentation with the full disclosure of the facts. It remains for the audience to determine whether the speaker's outside interest may reflect a possible bias in either the exposition or the conclusions presented. All speakers or activity planners who refuse to disclose will be barred from any future involvement in the planning or provision of Area L AHEC educational activities.
